

Data breach preparation: Insurance, planning & recovery

Monday 26 August | 12.30-1.30pm
Law Society House, Brisbane

Overview

Cyber attacks on Queensland solicitors continue, and with each successful penetration, the appetite of the criminals grows. An essential part of any cyber strategy is being ready for an event—big or small—affecting network integrity and client confidentiality. The QLS Cyber Essentials Insurance group policy puts essential resources within reach of smaller firms but the key to surviving a cyber incident with limited damage is preparation.

Join John DePeters, Chubb Insurance's Cyber and Technology Practice Leader and David Bowles (Ethics Solicitor, Queensland Law Society) for this complimentary session to ensure you understand the ethical, legal and practical steps needed to properly respond to a cyber-security breach and how to prepare a mandatory breach notification regime in advance. An effective response can dramatically reduce the impact on clients and firm.

1 CPD Point
